### Introduction

This Plan Performance Insights report provides directional insights into your plan by presenting key measures of plan health along with overviews of participant activity. The below are important background details to understand as you review this report.

#### How we capture data

Every month a comprehensive month-end "snapshot" of your plan's data is taken. The snapshot is a point-in-time capture of what is on the recordkeeping systems at the time that it is taken. Each month-end snapshot is then saved and stored so that it can be used to report on your plan's activity and performance over time.

These snapshots do not change after they are taken. Therefore, they may not reconcile with other reporting that accounts for adjustments or corrections applied after the snapshot was taken.

#### **Data quality is key**

Good data drives good analytics. Several topics and metrics in this report rely on participant data that is provided by the plan sponsor or those who work on behalf of the plan. Providing and maintaining high quality data for your entire participant population ensures the accuracy of the insights presented.

When the required data for a topic is completely unavailable, the topic will be excluded from this report.

#### **Benchmarking**

You'll find benchmarking insights throughout this report. Benchmarks show how your plan compares to a peer group of other similar retirement plans that are on the same recordkeeping platform. The peer group used is based on your retirement plan's type and assets. The "Benchmark" represents the median (50<sup>th</sup> percentile) of the results that each plan in the peer group had for the metric that is being benchmarked. The "Top 10%" represents the 90<sup>th</sup> percentile for the same peer group.

Your peer group is comprised of 176 401(a) plans with assets in the \$10M - \$25M range.

## **Executive summary**

As of 3/31/2024

#### Overview

The assets and participant counts presented are effective as of period end. The assets do not reflect any adjustments, dividends, corrections, or similar that are processed after period end.

Cash flow
As of 3/31/2024

**Ending Balance** 

'Transfer Out', 'Adjustments'

\$23,604,484

## **Distribution activity**

As of 3/31/2024

#### Distribution activity at-a-glance<sup>1</sup>

		Separation of service	RMD	Death	Total
Year to date	Amount	\$191.7K	\$8.7K	\$187.8K	\$388.2K
	Transactions	71	4	17	92
Rolling 12 months	Amount	\$191.7K	\$8.7K	\$187.8K	\$388.2K
	Transactions	71	4	17	92

#### .....

#### **Overview**

The distribution activity details show the activity for all actively employed and separated from service participants.

<sup>1</sup>The year-to-date and rolling 12 month periods begin when the plan is loaded onto the recordkeeping system. Therefore, the periods may be less than indicated for plans that were recently added.

#### Subject

#### Description

#### Match behaviors

Match behaviors illustrates participants that are eligible for employer match and the different levels at which they are utilizing their available match benefits. It only includes match benefits where the employer chooses to make an established contribution that is based on the elective contributions that a participant makes. This excludes non-elective employer contributions that do not require the participant to make a contribution.

Each participant is evaluated against the match rule that individually applies to them as a single plan can have multiple match rules that cover different populations of eligible participants. The evaluation is based on a participant's deferral elections on file. Percentage deferral elections are always included and flat dollar deferral elections are also included when a salary has been provided as a participant's salary is used to convert their flat dollar deferral election to a percentage election. Participants with flat dollar deferral elections but without a salary are excluded from the analysis.

Included participants are assigned to one of the following match behaviors:

- Not contributing: Is eligible to contribute and to receive employer matching contributions but does not have a deferral election greater than 0%/\$0 on file.
- Missing out: Has a deferral election on file but it is below the amount required to receive the full amount of their available match benefit.
- Meeting the match: Has a deferral election on file that is the same amount that is required to receive the full amount of their available match benefit.
- Exceeding the match: Has a deferral election on file that is higher than the amount required to receive the full amount of their available match benefit.

#### Rate of return

Rate of return is calculated in 1 month intervals based on the opening balance, transaction activity, and closing balance for the month. The calculation is consistent with the procedures called by the participant website for displaying a participant's rate of return for a 1 month period. Determining the 1, 3, and 5 year returns is achieved by using an aggregation of the individual monthly rates of return for that period. Only participants with a result across all of the months in the period are included.

#### Description

### Investment strategy

Investment strategy includes all actively employed and separated from service plan participants with a balance. Each participant is assigned to a single investment strategy by evaluating the criteria for each investment strategy against the participant's fund balances and their use of investment services and features. This evaluation is done in a particular order and the investment strategy that ends up being assigned is the first one that has its criteria met.

The evaluation order and criteria for each possible investment strategy is as follows:

- Managed accounts: Assigned to any participant enrolled in an available managed account service.
- Online advice: Assigned to any participant utilizing an available online advice service.
- Asset allocation model strategy: Assigned to any participant enrolled in a model portfolio.
- Brokerage: Assigned to any participant utilizing an available self-directed brokerage account for any portion of their balance.
- Target-date strategy: Assigned to any participant with greater than 95% of their balance invested in one or two target-date funds. 5% of their remaining balance may be invested in funds in other asset classes.
- **Risk-based strategy**: Assigned to any participant with greater than 95% of their balance invested in one or two risk-based funds. 5% of their remaining balance may be invested in funds from other asset classes.
- **Do-it-yourself strategy:** Assigned to any participant that is not classified under any of the above investment strategies.

When applicable, the number of participants and their associated total balances that are assigned to the Target-date strategy or the Risk-based strategy will not match the assets and participant counts reported elsewhere for the funds within the Target-date or Risk-based asset classes. This is because all fund reporting is based on the holdings of all participants, regardless of a participant's assigned investment strategy.

#### **Equity exposure**

A participant's total equity exposure is the ratio of the total amount of their balance (across all investment options) that is exposed to equities, compared to their overall account balance. The amount that is exposed to equities for each individual investment option is calculated by multiplying the participant's balance within the fund by the percentage of the fund's underlying holdings that are in equity asset classes. The underlying asset allocation of each investment option is sourced from Morningstar LLC. In the event that an investment option's asset allocation is unavailable, it is defaulted to having 50% allocated to equities.

#### Description

### Concentrated investment extremes

The concentrated investment extremes insights presented are based on all actively employed and separated from service plan participants that have a balance greater than \$0 and that have been classified as using the Do-it-yourself investment strategy. Concentrated investment extremes are defined as:

**Equity risk**: Participants that are age 50 or older and that have 75% or more of their total balance exposed to equities.

• These participants may be inadvertently over-exposing themselves to too much equity (or market) risk, causing them to be vulnerable in market downturns or times of general volatility, a risk particularly harmful to those nearest retirement.

Inflation risk: Participants of any age, that have 10% or less of their total balance exposed to equities.

• These participants may be too removed from the market. While taking on too much risk, as illustrated with the equity extreme definition, can be detrimental to participant outcomes, the inverse can also be true. Participants underexposed to equities (or the market more broadly) can suffer from lack of investment returns which would otherwise bolster their performance and account balance growth.

#### Advisory services

Advisory services includes all active and terminated participants with a balance. It compares the participants enrolled in the managed account service or online advice service against the participants that are not enrolled as of the last day of the reporting period. Each participant is only included in one group.

## Fund exposure by investment strategy

The calculation for an individual participant's exposure to an investment option is: Participant's balance in the investment option divided by the participant's overall account balance. Participants without a balance in a fund are excluded when calculating the average for each fund. Average fund exposures are provided for the population of participants within each investment strategy to provide insights into how participants of each investment strategy are utilizing the investment lineup.

#### Asset allocations

Illustrates the total of participant balances within the different investment options and their associated asset class. Plan level assets and outstanding loan balances are not included. The % of total assets represents the total of participant assets within the fund divided by the total of all participant balances. The participant counts include all actively employed and separated from service plan participants with a balance greater than \$0 in the fund.

#### Net interfund transfer activity

Participant transfer in counts are a distinct count of the participants that had transfer in financial activity during the timeframe. Participant transfer out counts are a distinct count of the participants that had transfer out financial activity during the timeframe. Net transfers are the net of the transfer in and transfer out financial activity. Net transfers as a % of a fund's assets is derived by dividing the net transfers amount by the total of participant balances within the investment option. Plan level assets and outstanding loan balances are not included.

#### **Subject** Description of terms

#### Plan insights: Plan detail

- Median Lifetime Income Score: Refer to the Lifetime Income Score subject.
- $\bullet$  Contribution rates: Refer to the contribution rates subject.
- Participation rate: Refer to the participation rate subject.
- Participant assets: Total of all participant balances. It does not include plan level assets or outstanding loan balances.
- Loan balance: Total amount of all active loans with an outstanding loan balance at month-end.
- Plan level assets: Total amount of plan assets which may include forfeitures, unallocated plan assets, and a plan expense account.

### Plan insights:

### Participant detail

- Eligible participants: Number of actively employed participants that are eligible to contribute to the plan.
- Eligible individuals not participating: Number of actively employed and eligible participants that do not have a deferral election on file that is greater than 0%/\$0.
- Participants contributing 10% or less: Number of actively employed and eligible participants that have a deferral election on file that is greater than 0% and less than 11%. Refer to the contribution rates subject for details about how flat dollar deferral elections are handled.
- Participants with a balance: Number of all the participants that have a balance >\$0.
- Average account balance: Average total balance of all the participants with a balance >\$0.
- Participants with loans: Percent of all the participants with a balance >\$0 that have at least 1 active loan with an outstanding balance >\$0.
- Participant email addresses captured: Percent of all the participants with a balance >\$0 and an email address on file.
- Participants without an email address: Number of all the participants with a balance >\$0 and no email address on file.
- Terminated participants with a balance <\$5,000: Number of separated from service participants that have an account balance that is less than \$5,000.
- Terminated participants with a balance <\$1,000: Number of separated from service participants that have an account balance that is less than \$1,000.

### Plan insights:

detail

Investment

- Investment options: Total number of investment options offered in the plan.
- Average funds utilized: Average of the total number of funds that each participant has a balance in. It is based on all the participants with a balance \$>0.
  Participants using advisory services: Percent of all the participants with a balance >\$0 that are using an available managed account service or online advice service.
- Participants using Target-date strategy: Percent of all the participants with a balance >\$0 that have been classified as using the Target-date investment strategy.
  - Participants using Risk-based strategy: Percent of all the participants with a balance >\$0 that have been classified as using the Risk-based investment strategy.
  - Participants using asset allocation model strategy: Percent of all the participants with a balance >\$0 that have been classified as using the asset allocation model investment strategy.
  - Participants using Do-it-yourself strategy: Percent of all the participants with a balance >\$0 that have been classified as using the Do-it-yourself investment strategy.
